Cresthwaite church, the parish

church of Keswick, stands quite outside the village, a little beyond Greta Hall, northward. It is a quaint, sedate structure, having a great square tower with heavy buttresses and a battlemented summit. The church is dedicated to St. Kentigern, who when a boy, according to the legend, restored to life a robin killed by his school mates and who is said to have planted the cross in the valley of the Thwaite in A. ## ANIMAL LIFE.

The army worm is essentially a grass enting insect, though it often feeds upon other plants, and is said to prefer outs to corn.

The malantecurus, a fish only eight inches long, can develop a shock of 200 volts of electricity in the two-thousandth part of a second.

Several pairs of pigeons which a scientist has observed in Paris have raised their young in nests made entirely of hairpins collected on the paths of the Luxembourg.

The largest nest in the world is built by the mound bird, a sort of Austra-Han fowl. It makes mounds sometimes 150 feet in circumference, in which it burles its eggs five feet deep.

The heaviest bird that flies is the great bustand. In size it exceeds the Nerwegian blackcock. The old males weigh about 35 pounds, but when food is plentiful the young males may weigh 40 pounds. Great bustards were formerly as plentiful in western Europe as partridges. Now they are rarely found.

#### Wurttemberg Stamps.

Stamp collectors will be interested in learning that one of the German states will disappear as a stamp issuing coun try in a few months. At present the kingdoms of Wurttemberg and Bavaria are the only states of the German confederation which have their own special postage stamps. It has long been the desire of the German emperor to have uniformity in this respect Quite recently the Reichsanzeiger an nounced that after April 1, 1902, Wurt temberg will cease to issue its stamps and will use those now in use in Germany generally. Bavaria has been approached on the subect, but the Bayarians will not listen to the proposal to give up their own stamps.

## BEWARE OF THE STRAP.

A Possible Source of Infection to Those Who Ride In Street Cars.

The connection between the microbe and the street car strap has frequently been discussed and at least one recent instance has proved somewhat distressingly that danger is likely to lurk in the piece of leather which helps to support so many women during the rush hours of the day. It was to protect a fresh pair of white gloves that a New York woman, compelled to stand, held her handkerchlef inside the strap while going to the theater. On her way home she was again compelled to stand, and once more the handkerchief came between her glove and the leather.

Whether it was after that or during the evening at the theater that she once thoughtlessly put the handker-chief to her face is a detail that she does not recall, but two days afterward a pain on her lip became so intolerable that she was compelled to see a doctor, who found her suffering from incipient | Anything we do now will be only a blood poisoning, which it was already too late for him to prevent. I must confess that I began with a predisposition, almost a prejudice, against the so-called Western Pianos, due largely to our long and satisfactory experience with those of New York and Boston manufacturers, but after reading the high commendation, the fine pianos made by the Cable Co., had received from the Syracuse Univer-Isity, of New York, the institution where our teachers of piano received their degrees, I began to investigate it on its Pmerits. I have received many expert opinions from unprejudiced musicians and teachers of piano and voice, and while some had a personal preference for other makes, all agree to place these fine pianos in the comparatively small number of artistic instruments. As the result of these in ? quiries, I came to the conclusion that while a number of Istandard makes would give us satisfactory service, only few would combine perfection of construction, depth and purity Tof tone, as these do.
